

FORGINGS 24/7 - Power Products Division

FORGED POWER PLANT PRODUCTS

- Heavy wall fittings
- Laterals
- Wyes
- Forged and bored pipe
- Tees
- Reducers
- Caps
- Venturi
- Special designed flanges
- Heavy Barrel Necks

FCI IN-HOUSE ENGINEERING IS AVAILABLE TO ASSIST YOU IN FORGING DECISION, MATERIAL SELECTION, AND CUSTOM FORGED PRODUCT DEVELOPMENT.

100 year old, newly renovated 3000 ton press

FORGED CONNECTIONS FOR PRESSURE VESSELS

- Long Weld Necks Connections _____LWN
- Heavy Barrel Connections _____HB
- Intermediate Barrel Connections _____I1, I2, I3
- Equal Barrel Connections _____E
- Super Barrel Connections _____SB
- Insert Lip Connections _____Q

ROUGH FORGINGS, CUSTOM PRODUCTS, LARGE DIAMETER FLANGES, STUDDING OUTLETS AND BUTTWELD STUB END CONNECTIONS

FORGINGS 24/7

FCI POWER PRODUCTS

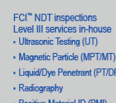

Forged Products for the Power/Nuclear Industry

FCI's in-house engineering is available to assist you in selection and custom forged product development.

- Special heavy wall fittings
- Tees
- Laterals
- Wyes
- Reducers
- Caps
- Crosses
- Forged & bored pipe
- Heavy barrel necks
- Special design flanges

- FCI's NDT Inspections
- Level III services in-house
- Ultrasonic Testing (UT)
- Magnetic Particle (MPI/TMT)
- Liquid Dye Penetrant (PT/DPT)
- Radiography
- Positive Material ID (PMI)

FCI ASME NOZZLES 24/7

Forged Connections for Pressure Vessels

- Long Weld Neck Conn. _____LWN
- Heavy Barrel Conn. _____HB
- Intermediate Barrel Conn. _____I1, I2, I3
- Equal Barrel Conn. _____E
- Super Barrel Conn. _____SB
- Insert Lip Conn. _____Q

- Rough forgings
- Custom products
- Large diameter flanges
- Studding outlets
- Buttweld stub end connections

- FCI Pressure Vessel Connections available in
- Carbon steel
- Alloy steel
- Stainless steel
- Nickel alloys

Dedicated to providing quality forged components to a global market

Current Divisions

FCI API WELLHEAD 24/7

Forged Components for Wellhead Systems

- Casing, tubing and well heads
- Casing spools and adapters
- API flanges and blinds
- Forged disc up to 95" O.D.
- Square and rectangular blocks
- High pressure valve body and bonnets

FCI insists on the highest quality standards. All custom forged components are manufactured and certified to API standards.

Custom forging and machining services dedicated to ASME and API products since 1997 with four manufacturing facilities on 40 acres and over 100,000 square feet under roof.

FCI SUBSEA INC. WCS ISO 9001

Forged Subsea Components for the Offshore Industry

FCI Subsea, Inc., formerly Alex, was founded for the purpose of providing subsea components to the offshore industry as well as providing custom machined forged components to all Forgings 24/7 companies.

- Large O.D. high yield flanges
- Manifold flanges
- Swivel ring assemblies
- Cuckoo tee
- Anchor flanges
- Studding outlets
- Bonnet flanges
- Check & kill boxes
- Rose flanges
- Specialty hubs & blocks
- RTJ weld inlet

100% CNC machining capabilities

- CNC Equipment
- Computer numerical control
- Turning capacity 5 lbs. to 10,000 lbs.
- Milling capacity to 20,000 lbs.
- Lifting capacity to 20,000 lbs.
